Boost Digi Culture

DIGITAL CULTURE MAP

The e-learning platform of the project is now published and users can register, to gain open access to a multitude of tools to be featured in the coming months.

Register for the digital culture map and have your profile featured in an interactive map, alongside a network of individuals and small and medium sized cultural organisations in the GLAM sector from across Europe.

Professional Digital Competence Profile (PDP)

PROJECT RESULT 2

The partnership is excited to present the completed Professional Digital Competence Profile (PDP), specific to the GLAM (Galleries, Libraries, Archives, Museums) sector. The PDP has been developed as a reference framework for the BoostDigiCulture microlearning upskilling programme for enhancing digital competences of cultural professionals, a course which will be available in the Boost e-learning platform in June 2023.

The PDP served as the starting point for the development of the BoostDigiCulture Self-assessment tool, aimed to help users of the platform assess their level of proficiency in digital competences related to the GLAM sector.
The Self-assessment tool, will be featured in the elearning platform in May of 2023 and will be freely accessible by users, institutions and individuals.

Retrieve a copy of the final report here.

AREAS OF THE PDP

Based on the findings of the research, the PDP comprises 3 areas: information and data literacy, communication and collaboration, and digital content creation. Each of the 3 areas involved 9 competences and three main levels of proficiency (basic, intermediate, advanced).

The areas and their accompanied competences, were chosen based on the specific needs the partnership identified for cultural professionals, drawing on the DigComp framework, desk research undertaken and focus groups conducted in the partner countries.

Registered users of the BoostDigiCulture learning platform, will be able to test their knowledge in the areas below and participate in the microlearning upskilling programme to improve their digital competences.
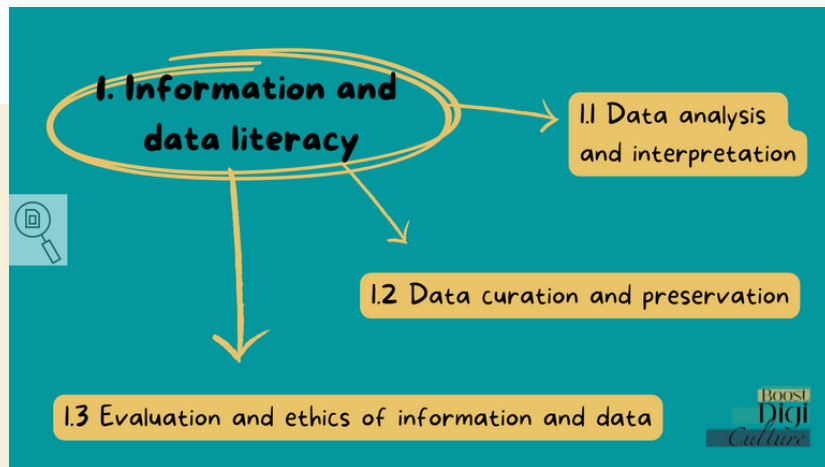

STAY TUNED FOR THE NEXT ISSUE!
